RESULTS

The results show the coefficient questionnaires are acceptable based on Cronbach's alpha test

The questionnaire is valid follow the Cronbach's statistic.

Table 4.2: Reliability Statistics

Cronbach's Alpha	N of Items
0.726	13

Table 4.3: Correlations

Correlations		Business Communication	Project Performance
Business Communication	Pearson Correlation	1	.637**
	Sig. (2-tailed)		.000
	N	55	55
Project Performance	Pearson Correlation	.637**	1
	Sig. (2-tailed)	.000	
	N	55	55

**. Correlation is significant at the 0.01 level (2-tailed).

No	Hypothesis	Analysis	Discussion	Result
1	H1: There is significant association between communication and project performance.	correlations value ($r = 0.637$)	Since the value of significant ($r = 0.637$) shows the relationship is moderate.	Accepted
	H2: Communication has a significant impact on project performance.	Adjusted R square value (0.497)	49 percent effected of communication on performance.	Accepted

CONCLUSIONS AND RECOMMENDATION

Conclusion: Communication was the important part on the successful project and also in project performance. Communication is very important in project that can give huge effect on the successful project. Performance on the project also can improve if the communication on the project if reach agreement superiors and subordinate on the both parties.

Recommendation: Researcher has to find and identify the interest for this research either this research would be beneficial to those have participate for this research. It very important to ensure that research will give good effect to others in future. The language and content used in communication need to improve.
